

Dear ICM Students and Families,

As a team, we wanted to reach out and let you know that we are thinking of you. We know these times mean different things for different families, and we want to be cognisant of that. We also want to try our best to help students maintain somewhat of a routine and sense of normalcy. We know that there needed to be a time of transition before we could jump in, and we feel that keeping our brains working is important. Our goals set at the beginning of the semester still apply, and we're ready to continue working towards achieving them. We believe that keeping our minds active will play an important role in this. With that being said, we would like to inform you of some things that students can be working on in the coming days.

The first thing available to work on is any Unit 2 DeltaMath homework that students may not have completed yet. This requires a DeltaMath account, so if for some reason you have not yet created one, please do so ASAP, as we will continue working with DeltaMath this semester. Teacher codes (which are used to join the correct class) are posted on the Weebly site under "Homework/Assignments".

Because of the circumstances, we are going to allow students to complete **any** of the Unit 2 assignments (up to "ICM Unit 2 Days 12-13") for full credit until Friday, April 3rd. **Please let your teacher know via email or Remind if and when you have completed any of this work.** Once we are able to teach the content covered on the "ICM Unit 2 Days 12-13" DeltaMath assignment, we will inform you of it's due date.

If students are looking for more ways to stay engaged, we have also posted some review assignments on our Weebly site, www.pchsicm.weebly.com. Click on the "Supplemental Materials" tab and select the unit you would like to work on. The keys are posted for you to check your work.

We will keep you posted on our next steps. Remember to keep your family's safety and health a priority.

Thanks,
Your ICM Teachers
